Nanotechnology is the study of atoms, electrons and molecules in the 0.1 ~ 100nm law of motion within the space characteristics, and press people will directly manipulate individual atoms, electrons or molecules, the preparation of the required materials or products with specific features, a high-tech, Nanotechnology, including the area of ??the nano electronics, nano-mechanical and nano-materials technology. Microelectronics and computer technology in the 20th century, 70 to 80 years, nanotechnology can be one of the new technologies for the 21st century. Its research and application will again bring a technological revolution in nanotechnology is still capable of implementation technology for nano-materials technology, and nano-materials technology can achieve practical nanocomposite technology modified for the purpose of . Nano plastic belongs to one of the the nanomaterials practical technology. Certain products to achieve mass production. To...
