EARTH: PART ONE - THE FUTURE IS HISTORY (PAPERBACK)

Createspace Independent Publishing Platform, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.A dark and deeply corrupt Earth, all but destroyed by millennia of human ignorance, is already on borrowed time. Having exhausted all other possibilities, our final chance for survival lies with an alien planet and its inhabitants. We have the technology, we ve gathered the resources, the path to survival is clear. but things are never that simple. The first book in the science fiction universe created by the Humanity series, Earth: The Future is History shows us a glimpse of how the world looks like in the year 2320. Earth: The Future is History tells a story about the triumph and failure of mankind, a story of how we ended up in such a dangerous situation and the impossible decisions we had to take along the way. --- Pollution, wars, global warming, corruption, famine, water shortages. and ignorance. Do you wonder what would happen to us if we fail to solve these problems? What mankind might become? How our own humanity will be reshaped and twisted to accommodate new realities? With the Humanity series, I invite you, my dear reader, to use my imagination as a tool to shape and see the dark, possible future of our mistakes.
