Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.On February 26, 2008, we issued our assessment of the Federal Aviation Administration s (FAA) oversight of aircraft manufacturers quality assurance systems for domestic and foreign aircraft part suppliers. Because aircraft and engine manufacturers are increasingly taking an international partnership approach to business, aircraft parts and component suppliers now produce significant parts of U.S.- and foreign- manufactured aircraft. Although aviation manufacturers are ultimately responsible for the quality of their products, FAA s Aircraft Certification Service personnel oversee manufacturers processes for ensuring that the products meet approved design specifications and are in a condition for safe operation. We found that FAA s risk-based oversight system for suppliers needs improvement as it does not consider the degree to which manufacturers now use suppliers to make aviation products. Specifically, (1) FAA has not ensured that manufacturers are providing oversight of their suppliers, (2) FAA does not require inspectors to perform enough audits of suppliers to determine how well manufacturers quality assurance systems are working, and (3) the systemic deficiencies we identified at 21 supplier facilities

### Reviews

*Completely essential study publication. This is for anyone who statte that there was not a well worth reading through. I am very easily could get a satisfaction of reading through a written publication.*
