Moreover, one mishap can prove fatal. The AN PSS-12 was used by U. S. forces in Somalia and by U. S. contractors in Kuwait and is currently deployed with U. S. forces in Bosnia. An Army after-action report from operations in Somalia states that the AN PSS-12 could not detect low-metallic mines, but it offers no specifics on the detection shortfalls. Although many landmines were reportedly found by U. S. contractors in Kuwait using the Schiebel and other metal detectors, the fact that they were buried in sand and in patterns made them easier to find than might be the case in other situations. These operations do not provide information on the percentage or number and types of mines that were found by the metal detectors, nor do they indicate what mines were not detected. The performance of the AN PSS-11 in several...
